EXPERIENCE

Software Engineer

Feb. 2025 – Present

LTIMindtree

Navi Mumbai, India

- Develop and maintain backend systems for chargeback and dispute processing for a major European payment processor, supporting high-volume financial transactions.
- Investigate and debug production issues by analyzing **ISO 8583** message flows and DB2 transaction states, ensuring data integrity and reliability.
- Perform data validation and corrections using DB2 SQL (SPUFI) and contribute to COBOL-based enhancements and production fixes.
- Support systems aligned with payment network rules (e.g., Visa/Mastercard) while ensuring accurate transaction processing.
- Recognized with the **iWin Team Player Award** at LTIMindtree for collaborative contribution and team impact.

Software Engineering Trainee (Virtual)

Jun. 2024 – Jul. 2024

Forage - JP Morgan Chase & Co.

[Certificate](#)

- Utilized JPMorgan Chase's Perspective library to build a live data feed graph, improving visibility by 30%, and repaired 20+ broken files to restore a functional development environment.

Cloud Virtual Intern

May 2023 – July 2023

AICTE NEAT (AWS Academy)

[Certificate](#)

- Gained proficiency in AWS core services, security, architecture, and pricing, with focus on cloud economics and infrastructure design patterns for AWS Certified Cloud Practitioner preparation.

PROJECTS

WeatherTrakt - Real-time Weather App | *HTML, CSS, JavaScript*

[Live](#) | [GitHub](#)

- Built a dynamic weather web app using HTML, CSS, and JavaScript, integrating **OpenWeatherMap API** to fetch real-time data (temperature, wind speed, humidity).
- Designed a responsive UI with dynamic weather icons for intuitive and visually engaging user experience.

Human Fall Analysis with FallAIID Dataset | *IEEE Research Publication, Machine Learning*

[Paper](#) | [Kaggle](#)

- **Published research in IEEE** proposing an innovative approach to elderly fall detection using ML techniques.
- Categorized ActivityIDs into distinct classes to differentiate falls from daily activities, achieving **99.4% accuracy**.

Automatic Room Light Control | *Arduino, Hardware Prototyping, Sensors*

[GitHub](#)

- Designed an automated light control system using **Arduino** and **PIR sensors** to optimize electricity usage.

TECHNICAL SKILLS

Mainframe: JCL, VSAM, COBOL, DB2, CICS

Programming: Java, SQL

Web & Tools: HTML, CSS, VS Code, Git/GitHub

Domain: Payment Processing, Chargebacks & Disputes, Transaction Processing, ISO 8583

Core Subjects: Cyber Physical Systems, Data Structures & Algorithms, OOP

EDUCATION

SRM Institute of Science and Technology

Chennai, TN

B.Tech in ECE with specialization in Cyber Physical Systems, GPA: 9.24

Sept. 2020 – May 2024

- **Awards:** Outstanding Academic Performance Award (Topper in Specialization).
- **Scholarship:** Performance-based Scholarship received for 3 consecutive years.

CERTIFICATIONS

Generative AI Foundation Course

LTIMindtree

Agile Scrum Certifications

Pluralsight

Mastering Data Structures and Algorithms using C++
